

RM-1900 Talc Dry Powder Seed-Flow Lubricant

EZ-Slide® Talc Dry Powder Seed-Flow Lubricant is packaged especially for the agricultural market and is recommended whenever treated seed is being planted. It is designed for use in vacuum seed meter planters to ensure proper lubrication of equipment and to reduce moisture issues. Talc lubricant powder helps vacuum and feed-cup meter planters deposit 100% of the seed where you want it.

Key Features:

- Maximizes yield and profit by increasing plant population per acre
- Reduces moisture generated by vacuum planters
- Helps prevent “bridging” of seeds in planter by reducing moisture
- Helps seed flow smoothly & evenly through vacuum meter planters
- Reduces wear on vacuum meter components
- Available in 8 lb containers and 40 lb bulk powder boxes
