

RM-0901 80-20 Talc/Graphite Seed-Flow Dry Powder Lubricant

RM-0901 8 (8 lb) UPC: 0 82095 09010 4

Case: 4/33#

RM-0901 4 (40 lb) UPC: 0 82095 09014 2

Case: 1/40#

EZ-Slide® 80-20 Talc/Graphite Seed-Flow Dry Powder Lubricant is blended especially for use with treated seed in planting boxes. Originally developed for use in pressure planters for controlling moisture issues and lubricating, it also works exceptionally well in conventional seed planters in replacement of pure graphite. The talc reduces moisture, while the graphite helps the seed move effortlessly through the planter.

RM-0901 is available in a handy to use 8 lb container and in 40 lb bulk powder boxes.

Product Features & Benefits:

- Designed exclusively for treated seed
- Maximizes yield and profit by increasing plant population per acre
- Use in both gravity flow and air planters
- Reduces moisture issues, lubricates seed and equipment
- Helps prevent seed bridging in the planter
- High-purity for less meter wear
- Apply 4-6 oz. each time hopper is filled with seed

Package filled by weight, settling will occur during shipment and with handling.
