

RM-9950 Graphite Powder Seed-Flow Lubricant

EZ-Slide® Graphite Powder Seed-Flow Lubricant is packed especially for the agricultural market, in a convenient plastic shaker with an Ez-Pour spout. It is designed for use in high-speed planters and other farm equipment, to ensure proper lubrication and to reduce friction. Just shake it on – it helps the planter deposit 100% of the seed where you want it.

Key Features:

- Maximizes yield and profit by increasing plant population per acre
- Easiest, most economical way to apply seed-flow lubricant - No buildup!
- Helps prevent “bridging” of seeds in the planter
- Helps seed flow smoothly and evenly through high-speed planters
- Reduces wear on planter plates
- Available in 1 lb and 5 lb containers and 40 lb bulk powder boxes
